Dear Shri Bagchi,

I was happy to learn from your letter of your excellent work on vibration isolators. I must apologize for the long delay in replying to your letter. I was on long leave during May-June and then had to complete a large backlog of work. We have many projects where vibration isolator is important. For example, we are developing jointly with CMTI single point diamond turning lathe. Several of our lasers and laser-based instruments require vibration free tables. We are either building some type of vibration isolators in-house or are importing vibration isolated tables. I will be very happy if someone can develop complete vibration isolated systems for our applications.

We will be very happy to have you at CAT. I notice from the papers enclosed by you that you have given a talk at IISc on vibration isolation technique. We will be happy if you could give a similar talk in CAT also when you come. Please indicate a few dates which are convenient to you so that I can select one of these dates convenient to me. Tentatively I am available on July 28, 30, 1998. In August, I will be available at Indore on all days except 7, 8, 21, 22, 23.

With best regards,

Yours sincerely,

(D.D. Bhawalkar)

Shri S.N. Bagchi,
